

GEORGE P. BURDELL

**Assistant Professor
School of Engineering**

Biographical Sketch

Dr. George Burdell received his B.S. in Engineering from Ivy University in 1998 and his Ph.D. in Engineering from State University in 2004. After a postdoctoral research position at Private University, he joined the faculty at Georgia Tech in September 2005. Dr. Burdell's research expertise lies in solving difficult engineering problems with engineering principles. Dr. Burdell's educational activities include the design of an innovative graduate engineering course exploring applied engineering principles to common engineering problems. Dr. Burdell reviews for several journals and conferences in the field of engineering principles. Dr. Burdell has received numerous awards for his research including an NSF CAREER award and being named one of the top 100 engineers to watch by Engineering Times magazine.
